Comments

This is a peculiar case, as Barsotti has thrown 99% breaking balls, only registering 3 fastballs all summer. Prefers the slider over the curveball, especially earlier in counts. Slider has higher velocity and less break, curveball is slower with more downward action. Likes to spot pitches either high and armside or low and gloveside, but has struggled to hit his spots with the slider all summer, and has ballooned his ERA with 11 BB in 6 IP this past month. We have seen him once, on June 9, kncking 5 hits for 1 run in 2.2IP. He had his control in this outing, only walking one. If Barsotti limits the walks today, we have still proven we can hit him well.
