Comments

Densmore does a great job of locating his pitches, as we see fastballs, changeups and breaking balls all cluster around the same zone. He tunnels pictches off of his fastball, everything starts high and armside before breaking to other parts of the zone. Against lefties he will likely eliminate the changeup and work a fastball - breaking ball tunnel on the outer half of the plate. Fastball has reached the upper 80s as of late. His stuff isn't terribly impressive, but he mixes his pitches very well.
